

Week 5 – Power BI & Business Intelligence

Finalized Decisions and Immediate Actions

Finalized decisions

- Complete all 7 Week 5 tasks.
- Use the Sales, Products and Customers datasets.
- Create the required data relationships and DAX measures.
- Create the Power BI visualizations and interactive dashboard.
- Include business insights and recommendations.
- PNG screenshots are not required for every task because the priority is completing the tasks quickly.
- Save the final Power BI file as Week5_Sales_Dashboard.pbix.

Immediate actions

- 1 Make sure Tasks 1–7 are completed in Power BI.
- 2 Save the final .pbix file.
- 3 Create the Week-5-PowerBI-Business-Intelligence folder in GitHub.
- 4 Add the datasets and task notes to the Week 5 folder.
- 5 Add the Task 1–7 notes files to their respective task folders.
- 6 Upload the final .pbix file to GitHub.
- 7 Verify the GitHub Week 5 folder before submitting the repository link.
