

Week 4 – Statistics, Data Visualization & EDA

Internova Data Analysis Internship

Dataset: Student Performance

Task-01-Mean-Median-Mode

Brief explanation: Practical implementation of the assigned Week 4 topic using Python.

INSERT YOUR ACTUAL COLAB SCREENSHOT HERE

Task-02-Variance-Standard-Deviation

Brief explanation: Practical implementation of the assigned Week 4 topic using Python.

INSERT YOUR ACTUAL COLAB SCREENSHOT HERE

Task-03-Correlation-Probability

Brief explanation: Practical implementation of the assigned Week 4 topic using Python.

Conclusion

The project demonstrates basic statistical analysis, visualization, data cleaning, correlation analysis, insights and data-driven recommendations using a student performance dataset.
